SNUFFERS & COVERS

OFYR® MANUAL SNUFFERS & COVERS

THANK YOU SO MUCH FOR BUYING AN OFYR® PRODUCT. THIS MANUAL CONTAINS WARRANTY CONDITIONS, AND ADDITIONAL INFORMATION ABOUT ALL OUR SNUFFERS AND COVERS.

SNUFFERS 85, 100 & XL

The Snuffer 85 for our 85 models, the Snuffer 100 for our 100 models and the Snuffer XL for our XL model are useful for extinguishing fires quickly, for when fires are starting to die out and smoke, or for when there is a lot of hot ashes left in the unit when you are done cooking. Please note that these snuffers are not intended to be left on the cooking plate for extended periods. If you do so, a circle of corrosion may form on the cooking plate and extensive corrosion may form on the bottom of the snuffer.

COVERS 85 & 100

If you want to cover the cooking plate for extended periods of time we recommend using the Cover 85 for the 85 models and the Cover 100 for the 100 models instead. Unlike the Snuffers 85 and 100, the Cover 85 and 100 are not intended to be used to extinguish fires, only to protect the cooking plate. If you use these covers to extinguish fires, they may warp considerably. We do not accept liability for any warping resulting from improper use of the covers. Even when using the Cover 85 and 100, we cannot entirely rule out the possibility of corrosion forming on the cooking plate in the long term, which may in turn result in corrosion forming on the bottom of the covers. You can minimise this by applying a thick oil coating to the cooking plate underneath the cover.

Please note that we recommend removing the covers from your OFYR® cooking unit and storing them inside in the event of stronger winds. All of our covers are coated. This coating is quite strong, but will inevitably be damaged if the covers are used incorrectly.

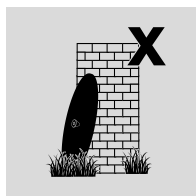

We strongly advise against placing any of our covers, the Snuffer 85, 100 & XL and the Cover 85 and 100 alike, on their sides on hard surfaces. The edges of all of our covers are relatively thin, and when the covers are placed on their sides, these edges are forced to bear a considerable weight; the resulting pressure will cause the coating to come off relatively easily. It is also better to place the Cover 85 and 100 in a flat position when not using them. These covers are relatively thin, and as such, they can easily warp when forced to stand on their sides for long periods on end. We do not accept liability for any damage resulting from improper use of covers.

Warranty terms per element

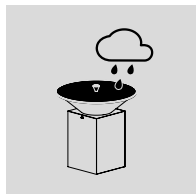

A limited lifetime warranty applies to the material and construction of all steel elements of all OFYR® cooking units for the original buyers or owners, provided that they purchased their unit from an authorised dealer and registered their warranty in the required manner.

	B2C	B2B
HEAT-RESISTANT BLACK COATED STEEL COVER AND SNUFFER	2 YEARS	1 YEAR
WOODEN KNOB	2 YEARS	1 YEAR

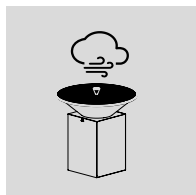

Disclaimers

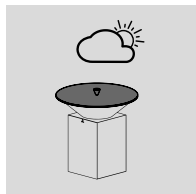

Do not put the cover or snuffer on its side. This can damage the coating.

Rain might cause corrosion on the covers

With stronger winds it is possible that the cover blows away from the OFYR® cooking unit.

The coating may discolour due to sunlight.
